PROFESSIONAL SUMMARY

Frontend Engineer with 2 years of professional experience building enterprise web applications, analytics dashboards, and a B2B e-commerce frontend with TypeScript, React, and Next.js. Built UI for BPJS Kesehatan and internal Telkomsigma systems and, during a Telkom Indonesia internship, an analytics frontend with embedded Metabase dashboards, alongside research on JWT-based embed access security.

TECHNICAL SKILLS

Core Languages & Frameworks: TypeScript, JavaScript (ES6+), React, Next.js (App Router), HTML5, CSS3

UI & Styling: Tailwind CSS (v3 & v4), shadcn/ui, Ant Design, Radix UI, Base UI, Responsive Web Design

State & Data Management: TanStack Query (React Query), Zustand, Redux, React Hook Form, Zod, TanStack Table, Recharts

Working Proficiency: Angular, Vue.js, Nuxt, Blazor (C#/.NET)

Tools & Ecosystem: Git, GitLab, GitHub, Bitbucket, Postman, Vite, RESTful API Integration, AI-assisted development (Antigravity)

PROFESSIONAL EXPERIENCE

PT Sigma Cipta Caraka (Telkomsigma) — Junior Programmer – Frontend Engineer — Nov 2024 – Oct 2026

Yogyakarta, Indonesia (On-site) · Fixed-term Contract (PKWT)

- Delivered frontend work across 10 enterprise and internal web applications and services in an Agile Scrum team, using React, Next.js, Angular, Vue.js, Nuxt, and Blazor (.NET).
- Implemented asset listing and user management modules for **IMAPS (BPJS Kesehatan)** using Angular 18, Ant Design (NG-ZORRO), and REST APIs, taking ownership of responsive layouts, UI component consistency, and security hardening across all modules.
- Built the Smart Contracting module (contract workflows, drag-and-drop form builders, client-side PDF document generation) and set up the initial Host Shell scaffolding on a micro-frontend architecture (Module Federation) on the frontend using Vite, React 19, and Ant Design 5 for **Alisa 2.0 (Infomedia Nusantara)**, while sharing workflows with two junior teammates.
- Built the frontend of the internal Whistleblowing System (WBS) using Next.js App Router, TypeScript, shadcn/ui, TanStack Query, and Zustand: analytics dashboard, case management with multi-tab details and manual report intake, configurable questionnaires, role-based access control (RBAC), and i18next multilingual support.
- Developed MONARA 2.0 (Christmas, New Year & Ramadan Monitoring) on Next.js App Router, TypeScript, shadcn/ui, and Zustand: an auto-refreshing ticket dashboard polling every 30 seconds, shift-based operations logging, master data management, and role-based access for Service Desk and Operations teams, covering about 40 service-provider units during Ramadan, Christmas, and New Year monitoring periods.
- Built the frontend for Info Tender (React 18, Vite, TypeScript, shadcn/ui, TanStack Query, Zustand), a government procurement monitoring app: LPSE and SIRUP analytics dashboards, tender monitoring with Excel export, a SIRUP-to-LPSE comparison view with match-confidence scoring, and scraper configuration screens for data collected twice daily by the backend scraper.

Tumbuhin Digital — Frontend Engineer (Freelance, Part-time) — May 2026 – Jun 2026

Remote

- Built the frontend for a B2B bulk-order e-commerce web application using Next.js 16 (App Router), React 19, TypeScript, and Tailwind CSS v4, implementing a modern client-server architecture and efficient interface rendering.
- Developed complex multi-step ordering flows, centralized cart state management using TanStack Query and Zustand, secure session-based authentication, and third-party payment gateway integration.

PROFESSIONAL EXPERIENCE (CONTINUED)

PT Telkom Indonesia — Developer Intern – Frontend Engineer Jan 2023 – Dec 2023

Jakarta, Indonesia (Remote) · Internship

- Built the frontend for **Netmonk Analytics** using React, Tailwind CSS, and Redux as an internship capstone project, providing order fulfillment analytics across 7 regional divisions (TREG) and 40+ branch offices (WITEL).
- Integrated embedded Metabase analytics dashboards and researched JWT-based embed access security (the foundation of undergraduate thesis).
- Supported maintenance of the Netmonk HI interface (React, Tailwind CSS) and collaborated with data teams to translate complex metrics into intuitive dashboard visualizations.

FEATURED PROJECTS

HiBlow Fleet — Personal Project (github.com/hadidwirsty/hiblow-fleet) 2026

- Built a full-stack operations and finance application for a private bulk cement fleet business, replacing a manual spreadsheet with a centralized system.
- Built with Next.js App Router (Server Components and Server Actions), PostgreSQL via Drizzle ORM, and Better-Auth, with role-based access separating administrators from an investor view limited to profit-sharing reports.
- Implemented trip logging, expense tracking, profit-sharing calculation, and tax-scheme comparison, with an interactive Recharts dashboard for trip revenue, operating expenses (fuel, driver allowance), and margins.

Tech: Next.js (App Router, React Server Components, Server Actions), TypeScript, Tailwind CSS v4, shadcn/ui, PostgreSQL (Drizzle ORM), Better-Auth, Recharts, @tanstack/react-table, Zustand

IS-WARE (Proof of Concept) — PT Sigma Cipta Caraka (Client: PT KBI – Danareksa Group) 2025

- Developed a warehouse-receipt management proof-of-concept in a 2-week sprint at Telkomsigma with 5-role RBAC, authentication, an audit trail covering each receipt's workflow from creation to approval, and warehouse master data (warehouses, commodity types, inspection companies).
- Contributed a responsive UI to the proposal that ranked #1 in the client's technical evaluation.

Tech: Next.js, TypeScript, Tailwind CSS, shadcn/ui, TanStack Query, Zustand

Additional Contributions: *PIS MARS (Pertamina International Shipping, 2026)*: Enhanced user interfaces, admin modules, and business workflows while resolving functional bugs on an active Blazor/.NET 8 (C#) enterprise maritime system. · *Caterine (2025)*: Implemented Change Management (CM) UI modules and resolved frontend Change Request (CR) tickets using Vue.js and Pinia. · *CART (Cyber Security, 2025)*: Built cybersecurity threat intelligence interfaces, client package configurations, and menu navigation using Nuxt 3, Headless UI, and Pinia. · *Enterprise Web Applications Maintenance (2025–2026)*: Resolved frontend bug-fix tickets and implemented frontend fixes for security findings from vulnerability scan reports across 2 enterprise web applications.

EDUCATION

Universitas Gadjah Mada (UGM) — Bachelor of Computer Science (S.Kom.) 2020 – 2024

Yogyakarta, Indonesia · GPA: 3.74 / 4.00

Thesis: Access Security for Embedded Metabase Dashboards using JSON Web Token on the Netmonk Web Analytics Prototype.

CERTIFICATIONS

- **Become a React Web Developer Expert** — Dicoding Indonesia (Valid Oct 2024 – Oct 2027)
- **Learn Intermediate Web Front-End Tools** — Dicoding Indonesia (Valid Oct 2024 – Oct 2027)
- **React Essential Training** — LinkedIn Learning (Issued Jul 2025)
- Additional Credentials: Learn Web App Fundamentals with React, Beginner Front-End Web Development, Basic JavaScript Programming (Dicoding Indonesia, valid through 2027).

HONORS & LEADERSHIP

- **3rd Place, Data Analysis Category** — DEXA-DIKE Innovation Award 2022 (DIKE Lab RPDL & Dexa Group)
- **Finalist** — HackGov UGM Hackathon 2021
- **Head of Interest & Talent Division** — HIMAKOM UGM (Feb 2022 – Feb 2023): Coordinated division work programs and student talent initiatives.
