PROFESSIONAL SUMMARY

Frontend Engineer with 2 years of professional experience building enterprise web applications, data-intensive analytics dashboards, and modern e-commerce platforms using TypeScript, React, and Next.js. Proven track record delivering production UI for national institutions (BPJS Kesehatan, Telkom Indonesia) and international retail, specializing in complex state management, data visualization, and secure API integration.

TECHNICAL SKILLS

Core Languages & Frameworks: TypeScript, JavaScript (ES6+), React, Next.js (App Router & Pages Router), HTML5, CSS3

UI & Styling: Tailwind CSS (v3 & v4), shadcn/ui, Ant Design, Radix UI, Base UI, Responsive Web Design

State & Data Management: TanStack Query (React Query), Zustand, Redux Toolkit, React Hook Form, Zod

Working Proficiency: Angular, Vue.js, Nuxt, Blazor (C#/.NET)

Tools & Ecosystem: Git, GitLab, GitHub, Bitbucket, Postman, Vite, TanStack Table, Recharts, RESTful API Integration

PROFESSIONAL EXPERIENCE

PT Sigma Cipta Caraka (Telkomsigma) — Junior Programmer – Frontend Engineer — Nov 2024 – Oct 2026

Yogyakarta, Indonesia (On-site) · Fixed-term Contract (PKWT)

- Developed and maintained responsive frontend interfaces across 10 enterprise and internal web applications utilizing React, Next.js, Angular, Vue.js, and Nuxt in an Agile Scrum environment.
- Built asset listing and user management modules for **IMAPS (BPJS Kesehatan)** using Angular and REST APIs, and led responsive UI refactoring across the platform to ensure multi-device operational stability.
- Initiated project scaffolding, folder architecture, and base UI layouts with shadcn/ui for **Alisa 2.0 (Infomedia Nusantara)** within a micro-frontend architecture, onboarding and mentoring two peer junior programmers on team workflow.
- Developed the internal **Whistleblowing System (WBS)** end-to-end on Next.js, implementing multilingual localization (i18next), dynamic reporting forms, and secure REST API integration for company-wide internal usage.
- Built **MONARA (Command Post Monitoring)** using Next.js, delivering real-time incident monitoring dashboards and master data management covering 41 monitored services during Ramadan, Christmas, and New Year command posts.
- Engineered **Info Tender** across two iterations, automating scraping for 10+ daily government tender packages from LPSE and SIRUP, implementing data comparison views and notification dashboards with React and Zustand.

Tumbuhin Digital — Frontend Engineer — May 2026 – Jun 2026

Remote · Freelance

- Architected and implemented the frontend for **Momiji Home** (github.com/Tumbuhin-Digital/momiji-home-frontend), a B2B wholesale purchasing and interior supply-chain platform for the US market, using Next.js 16 (App Router), React 19, TypeScript, and Tailwind CSS v4.
- Implemented a concurrency mutex for token refresh on Axios interceptors using the browser-native **Web Locks API** (`navigator.locks.request`) with an in-memory queue fallback, eliminating cascading 401 errors across parallel requests.
- Engineered complex fulfillment business logic, including a multi-warehouse shipping split, a 50/50 pre-order installment calculator with zero rounding drift, and tiered pre-order batch allocation with `@dnd-kit` drag-and-drop.
- Built a **Domain Adapter Pattern** isolating backend Go REST DTOs from UI domain entities, and integrated Shopify Hosted Checkout with synchronous window pre-opening to prevent browser popup blockers.

PROFESSIONAL EXPERIENCE (CONTINUED)

PT Telkom Indonesia — Developer Intern – Frontend Engineer Jan 2023 – Dec 2023

Jakarta, Indonesia (Remote) · Internship

- Built the frontend for **Netmonk Analytics** using React, Tailwind CSS, and Redux as an internship capstone project, providing order fulfillment analytics across 5 regional divisions (TREG) and 40+ branch offices (WITEL).
- Integrated embedded Metabase analytics dashboards and researched JWT-based embed access security (the foundation of undergraduate thesis).
- Maintained and optimized UI modules for **Netmonk HI** (network monitoring product) and collaborated with data teams to translate complex metrics into intuitive dashboard visualizations.

FEATURED PROJECTS

Momiji Home — Frontend Engineer (github.com/Tumbuhin-Digital/momiji-home-frontend) 2026

- Built a B2B wholesale purchasing storefront and interior supply-chain management dashboard for the US market using Next.js 16, React 19, Tailwind CSS v4, and Zustand 5.
- Implemented guest cart session auto-recovery, bidirectional search filter synchronization to URL parameters (`nuqs`), and internationalization (`i18next`).

Tech: Next.js 16, React 19, TypeScript, Tailwind CSS v4, shadcn/ui, TanStack Query, Zustand, Shopify API

HW Trans Fleet (hiblow-fleet) — Personal Project (github.com/hadidwirsty/hiblow-fleet) 2026

- Engineered an operational and financial management web application for a private bulk cement distribution fleet business, digitizing end-to-end spreadsheet tracking into a centralized system.
- Developed an interactive analytics dashboard featuring real-time trip revenue, operational expense tracking (fuel & driver allowance), PnL margins, tax scheme estimation, and multi-series fleet activity charts.

Tech: Next.js (App Router, RSC / Server Actions), TypeScript, Tailwind CSS v4, shadcn/ui, Recharts, @tanstack/react-table, Zustand

IS-WARE (Proof-of-Concept) — PT Sigma Cipta Caraka (Client: PT KBI – Danareksa Group) 2025

- Developed a warehouse-receipt management Proof-of-Concept in a 2-week sprint at Telkomsigma, implementing authentication, audit trail, warehouse master data, and multi-role RBAC across 5 distinct user groups.
- Delivered a high-quality responsive UI that led Telkomsigma's tender proposal to rank #1 in the client's technical evaluation.

Tech: Next.js, TypeScript, Tailwind CSS, shadcn/ui, TanStack Query, Zustand

Additional Contributions: *PIS MARS (Pertamina International Shipping, 2026)*: Enhanced marine reporting UI and resolved critical workflow bugs on a Blazor/.NET 8 enterprise system. · *Caterine (2025)*: Developed Change Management UI modules and handled change requests (CR) using Vue.js and Pinia. · *CART (2025)*: Implemented cybersecurity threat intelligence and vulnerability management menu navigation using Nuxt and Headless UI. · *CISS Managed Services (2025–2026)*: Resolved frontend bugs and remediated security vulnerabilities across 3 active enterprise CIS applications (LSM, Federica, Patricia).

EDUCATION

Universitas Gadjah Mada (UGM) — Bachelor of Computer Science (S.Kom.) 2020 – 2024

Yogyakarta, Indonesia · GPA: 3.74 / 4.00

Thesis: Access Security for Embedded Metabase Dashboards using JSON Web Token on the Netmonk Web Analytics Prototype.

CERTIFICATIONS

- **Become a React Web Developer Expert** — Dicoding Indonesia (Valid Oct 2024 – Oct 2027)
- **Learn Intermediate Web Front-End Tools** — Dicoding Indonesia (Valid Oct 2024 – Oct 2027)
- **React Essential Training** — LinkedIn Learning (Issued Jul 2025)
- Additional Credentials: Learn Web App Fundamentals with React, Beginner Front-End Web Development, Basic JavaScript Programming (Dicoding Indonesia, valid through 2027).

HONORS & LEADERSHIP

- **3rd Place, Data Analysis Category** — DEXA-DIKE Innovation Award 2022 (DIKE Lab RPDL & Dexa Group)
- **Finalist** — HackGov UGM Hackathon 2021
- **Head of Interest & Talent Division** — HIMAKOM UGM (Feb 2022 – Feb 2023): Led division work programs and coordinated student talent initiatives.
